Profile

Dana AlHayki, a dynamic and dedicated IT student whose passion for technology knows no bounds. Currently pursuing a Bachelor's degree in Cybersecurity and a diploma in Full Stack Development, Dana is not only adept at mastering complex programming languages but also deeply engaged in the ever-evolving realm of cybersecurity. With an impressive breadth of knowledge spanning networking, information systems, and computer science, Dana is a true tech enthusiast who embraces every new challenge with enthusiasm and agility. Always eager to expand their expertise, Dana stands out as a versatile learner, ready to tackle any technological innovation that comes their way.

Education

2022 – Present	Bachelor of CyberSecurity , <i>University Of Bahrain</i>
2023 – 2026	Diploma in Programming “Full Stack Developer”+ “Mobile Application Developer” , <i>Reboot01 Programming Institute</i>
2019 – 2022	High School Degree , <i>AlHidd Secondary Girl School</i>

Expertise

Microsoft Office	Mobile application development	Full stack development
IT project coordination	Technical Troubleshooting	Multilingual programming GOLANG , JAVA , PYTHON , JAVASCRIPTS , RUST , SQL
Database management	Software and Database design	

Language

Arabic “native”	English
---------------------------	----------------

Certificate

Website Development Education For Employment + J.P Morgan	Cyber Security Safety Online Awareness OPS Cyber Academy Under The Proven Training For NCSC	Project Management Coursera Project Network
Secure Software Development Coursera , Packet	AI Game Day – Participation Certificate Royal Academy of Police & Information & eGovernment Authority	Introduction to Cybersecurity Tools & Cyberattacks IBM ,Coursera

Achievement

11/2025	Volunteer Certificate Volunteered at Arab International CyberSecurity Conference and Exhibition (AICS) as an organizer in UOB workshop
10/2025	Volunteer Certificate Volunteered at BAYG as an organizer in IT Team

Projects

09/2025 – 04/2026	ShellSentry (Senior Project) <i>🔗</i> , <i>Secure Natural Language to Bash Execution</i> - Designed and developed an AI-powered secure command execution platform for Linux environments. - Implemented natural language processing capabilities to translate user requests into validated Bash commands. - Developed security controls to prevent unsafe, unauthorized, or malicious command generation. - Built a command validation layer to verify commands before execution on remote systems via SSH. - Integrated Retrieval-Augmented Generation (RAG) with FAISS to provide context-aware and secure responses.
04/2026 – 06/2026	Secure Messenger <i>🔗</i> , <i>Flutter, Firebase, RSA, AES-GCM, Cloud Functions</i> - Developed a secure cross-platform messaging application using Flutter and Firebase. - Implemented end-to-end encrypted (E2EE) secret chats using RSA key exchange and AES-GCM encryption. - Integrated biometric authentication, group messaging, media sharing, and QR-based contact discovery. - Configured Firebase Cloud Messaging (FCM) push notifications through Cloud Functions. - Applied Firestore and Firebase Storage security rules and developed unit tests for core services.
04/2026 – 05/2026	Risk Management Plan, <i>Meridian FinTech Solutions Enterprise Security Risk Assessment, Compliance Framework</i> - Conducted a comprehensive security risk assessment for a simulated FinTech organization. - Identified security threats, vulnerabilities, and potential business impacts across organizational assets. - Developed structured risk mitigation and countermeasure strategies aligned with industry best practices. - Evaluated compliance requirements and provided recommendations to strengthen security governance. - Produced an enterprise-focused risk assessment and compliance framework report.
02/2025 – 06/2025	Social Network Platform <i>🔗</i> , <i>Vue 3, Go, SQLite, WebSockets, Docker, Nginx Team of 4</i> - Developed a full-stack social networking platform featuring profiles, posts, followers, groups, events, and real-time communication. - Designed and implemented a Go REST API with over 70 endpoints to support platform functionality. - Built WebSocket services for real-time messaging, notifications, and live updates. - Implemented privacy controls, media uploads, group invitations, and event RSVP functionality. - Containerized the application using Docker and deployed it with Nginx.
