Profile

A dynamic and dedicated IT professional with a passion for technology that knows no bounds. Completed a Bachelor's degree in Cybersecurity and a Diploma in Full Stack Development, mastering complex programming languages while engaging deeply in the evolving realm of cybersecurity. With knowledge spanning networking, information systems, and computer science, stands out as a versatile specialist, driven by enthusiasm and determination to carve a confident and innovative career path.

Education

2022 – 2026 **Bachelor of CyberSecurity,** *University Of Bahrain*

2023 – 2026 **Diploma in Programming "Full Stack Developer"+ "Mobile Application Developer",** *Reboot Coding Institute*

2019 – 2022 **High School Degree,** *AlHidd Secondary Girl School*

Expertise

Microsoft Office

Mobile application development

Full stack development

IT project coordination

Technical Troubleshooting

Multilingual programming
GOLANG , JAVA , PYTHON , JAVASCRIPTS , RUST , SQL

Database management

Software and Database design

Language

- Arabic "native"
- English

Certificate

Website Development
Education For Employment + J.P Morgan

Secure Software Development
Coursera , Packet

HCIA OpenEuler MOOC Exam
HUAWEI Technology Bahrain

Cyber Security Safety Online Awareness
OPS Cyber Academy Under The Proven Training For NCSC

Al Game Day – Participation Certificate
Royal Academy of Police & Information & eGovernment Authority

Project Management
Coursera Project Network

Introduction to Cybersecurity Tools & Cyberattacks
IBM ,Coursera

Achievement

07/2026 – 08/2026 **Youth City 2030 - Usheer Committee**
Volunteer as an organizer in usheer Committee

06/2026 – 08/2026 **Information Technology Intern,** *Ministry of Interior*
- Contributed to day-to-day administrative and operational activities within a government institution.
- Helped organize, review, and maintain official documentation and institutional records.
- Supported the preparation, formatting, and handling of official correspondence and internal reports.
- Strengthened attention to detail, organizational habits, and confidence working within structured workflows.

11/2025 – 11/2025 **Volunteer – IT Team**
Volunteered at Arab International CyberSecurity Conference and Exhibition (AICS) as an organizer in UOB workshop

10/2025 – 10/2025 **Technical Volunteer**
Volunteered at BAYG as an organizer in IT Team

Projects

09/2025 – 04/2026 **ShellSentry (Senior Project)** , *Secure Natural Language to Bash Execution*
- Designed and developed an AI-powered secure command execution platform for Linux environments.
- Implemented natural language processing capabilities to translate user requests into validated Bash commands.
- Built a command validation layer to verify commands before execution on remote systems via SSH.
- Integrated Retrieval-Augmented Generation (RAG) with FAISS to provide context-aware and secure responses.

04/2026 – 06/2026 **Secure Messenger** , *Flutter, Firebase, RSA, AES-GCM, Cloud Functions*
- Developed a cross-platform messaging application with end-to-end encrypted secret chats using RSA and AES-GCM.
- Implemented biometric authentication, group messaging, media sharing, push notifications, and Firebase security rules.

04/2026 – 05/2026 **Risk Management Plan** , *Meridian FinTech Solutions*
- Conducted a comprehensive security risk assessment and Identified security threats, vulnerabilities, and potential business impacts across organizational assets.
- Developed structured risk mitigation and countermeasure strategies aligned with industry best practices.

02/2025 – 06/2025 **Social Network Platform** , *Vue 3, Go, SQLite, WebSockets, Docker, Nginx | Team of 4*
- Developed a full-stack social networking platform featuring profiles, posts, followers, groups, events, and real-time communication.
- Designed and implemented a Go REST API with over 70 endpoints to support platform functionality.
- Built WebSocket services for real-time messaging, notifications, and live updates.
- Implemented privacy controls, media uploads, group invitations, and event RSVP functionality.
- Containerized the application using Docker and deployed it with Nginx.

Note: Additional projects are available in my portfolio. If you require examples relevant to a specific role or technology, please don't hesitate to contact me.
